

November 8, 2019

Dear Parents,

In Language Arts this week, our focus was on identifying literary elements of a drama and using text evidence to determine the theme, or author's message/lesson in the story. In grammar, students practiced applying spelling rules to form the plural form of regular and irregular plural nouns.

In Math, we continued our Module 3 EngageNY Unit this week. Our focus was on multiply 1 and 2 digit numbers by multiples of ten using a place value chart and area model.

In Social Studies, we investigated how distance from the equator, distance from the ocean, and elevation affect the climate of an area. Additionally, students continued researching their focused topics for their city brochures.

In Science, students examined how energy is transferred when objects collide during activities, such as baseball, tennis, bowling, and billiards.

Please feel free to contact me with any questions or concerns at jalviano@cpsed.net.

Happy Veteran's Day!
Mrs. Alviano
